

Institute of Technology Tallaght, Dublin.

Established in 1992, Institute of Technology Tallaght provides high quality academic programmes in Business, Engineering and Science to PhD level. It emphasises the appropriate use of new technology and the development of quality systems.

It operates within the National Qualifications Authority of Ireland (NQAI) which provides assurance that all its courses are quality assured and all its staff have high level qualifications.

It has developed a strong reputation as an Institute that conducts high quality research. It delivers Degree, Masters and PhD graduates ready to meet the needs of business, industry, the public sector and society in Ireland and internationally.

It has demonstrated that it has the capacity to deliver highly skilled researchers for the national economy by conducting research to the highest international standards.

Services to industry and commerce include short courses, research and consultancy and the delivery of bespoke staff development solutions.

Institute of Technology Tallaght has a state of the art innovation space called Synergy Centre which provides office space and business support to early stage enterprises. This purpose built high-tech three storey complex is located on-site at the Institute and supports high technology and knowledge intensive enterprises which have real potential to foster innovation, create jobs and generate export potential.
